

HAKOFIX® OUR HOOK AND LOOP FASTENER

ANNIVERSARY

Hakofix® Origin

The Hook and Loop fastener celebrates its 70th birthday this year, thanks to its founder, the Swiss engineer Georges de Mestral.

KUNY AG, a Swiss company with headquarters in Küttigen and over 100 years of tradition, have produced a hook and loop fastener for many years and has developed this technology continuously during the last decades and enhanced the field of applications like hotmelt, back to back, ultrasonic welding etc.

KUNY AG offers a wide range of products under its name Hakofix® that meets the highest requirements.

Hakofix® FR flame retardant

In 2017 at Techtextil in Frankfurt KUNY AG presented the first permanent and inherent flame retardant Hakofix FR® and has successfully launched on the market.

Hakofix® armasuisse

Hakofix® with long lasting functionality and outstanding hot wash resistance even at 95°C, which fulfills Swiss Army Standard and has been successfully field tested over many years in different application areas.

During the last few years KUNY AG have developed a technology which allows to integrate individual infrared spectrum on to the required shades.

KUNY AG has gone one step further and has launched the Camouflage technology. This technology allows us to print camouflage pattern on Hakofix® products according to customer needs and required LAB- and IR-Values.
